Password-Manager

It is a simple password manager that stores new passwords and generates random and strong passwords according to the given length.

Working: It is basically a CLI(command line interface) based python program. It first asks for the option you want to opt for then works accordingly. The details like sitename, username and passwords are stored in a table in a database. I have used mysql database for this password manager

```
C:\Windows\System32\cmd.e x + v
Microsoft Windows [Version 10.0.17134.1]
(c) Microsoft Corporation. All rights reserved.

C:\Users\user\Documents\python projects>python generate.py
Menu:
1. Store a new password
2. Generate a random password
3. View a password
4. Exit
Enter your choice (1/2/3/4): |
```

```
C:\Windows\System32\cmd.exe x + v
Microsoft Windows [Version 10.0.17134.470]
(c) Microsoft Corporation. All rights reserved.

C:\Users\user\Documents\python projects>python generate.py
Menu:
1. Store a new password
2. Generate a random password
3. View a password
4. Exit
Enter your choice (1/2/3/4): 1
Enter the sitename: abcd.com
Enter the username: abcd
Enter the password: 123456
Data saved to the database successfully!
Menu:
1. Store a new password
2. Generate a random password
3. View a password
4. Exit
Enter your choice (1/2/3/4):
```

```
C:\Windows\System32\cmd.exe x + v
C:\Users\user\Documents\python projects>python generate.py
Menu:
1. Store a new password
2. Generate a random password
3. View a password
4. Exit
Enter your choice (1/2/3/4): 2
Enter the desired password length: 8
Generated password: ]>b:u*6A
Copied to clipboard!
Menu:
1. Store a new password
2. Generate a random password
3. View a password
4. Exit
Enter your choice (1/2/3/4):
```

```
C:\Windows\System32\cmd.exe x + v
C:\Users\user\Documents\python projects>python generate.py
Menu:
1. Store a new password
2. Generate a random password
3. View a password
4. Exit
Enter your choice (1/2/3/4): 3
Enter the sitename for which you want to view the password: abcd.com
Password for abcd.com: 123456
Copied to clipboard!
Menu:
1. Store a new password
2. Generate a random password
3. View a password
4. Exit
Enter your choice (1/2/3/4):
```
